

COMPANY PROFILE

PT Konsep Dot Net
www.konsep.net

We are software development and IT outsourcing company with experienced professionals ready and committed to provide you IT services to turn your "Concept into Reality".

Our mission is "to provide great business values and optimized solutions needed by our clients to finally improve our stakeholders quality of life". Yet, we have vision "to be the number one player in Indonesian IT Industry".

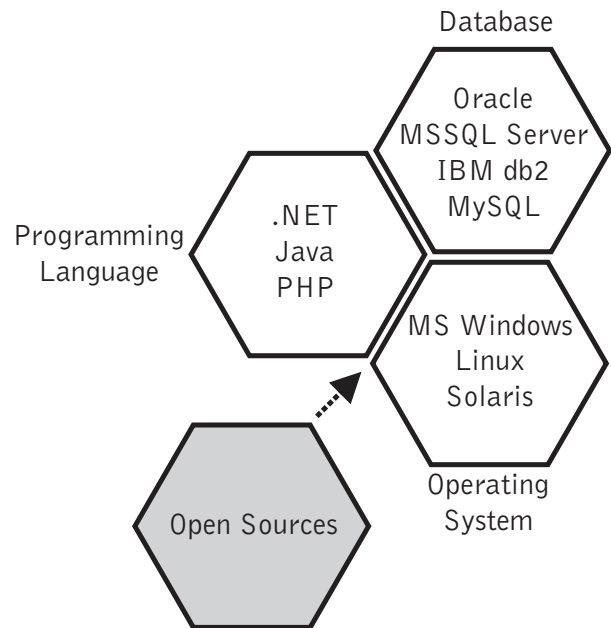

Our values determine how we treat our people, clients, and partners. They define who we are and how we do our jobs. It also help us to work together in the most effective way. Our values are:

- ◆ Integrity
- ◆ Competence
- ◆ Client Forever
- ◆ Committed
- ◆ Added Value

Our Technology

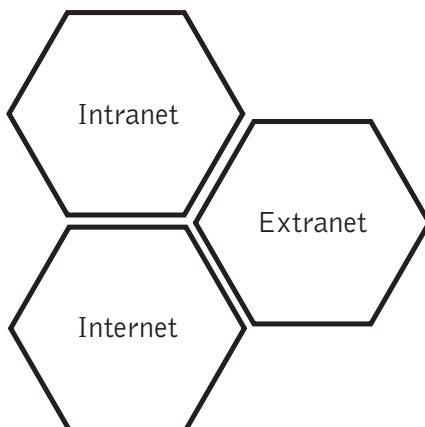

We deliver the best of breed solution from mature and proven technology. Konsep.net's creative development teams have experienced in developing solution using various platform such as Java, .NET, and PHP. Databases such as MySQL, Oracle MSSQL Server, deployed on top of superb application server and operating system that have been successfully integrated in our solution to meet our clients' needs.

How We Work

Our Skills

We offer wide range solutions starting from software products, mobile system, workflow and enterprise systems. Konsep.net competently help its clients to fulfill their business needs including consultation, design, development, testing, implementation, training, and maintenance.

Open Sources

To optimize our solution and maximize our clients interest (performance, TCO, ROI), many times we found part of the solution in Open Sources. With plenty of best solution in Open Sources and equal the opportunity in acquiring the best result in the world, Konsep.net chooses to incorporate Open Sources as one of our competency.

We help companies to meet their business objectives by enhancing their daily business activities with the right IT strategies and methods to implement them.

Custom Solution

Custom Solution, specifically designed to meet companies unique business requirements. We work closely with our clients not only documenting their requirements but also becoming their partner in providing optimized solutions for their variety needs.

Products

We also have "off the shelf application" that are ready to use. The products are designed for further customization to suit our clients' needs in the most flexible ways.

Open Source Implementation

Arguably, Open-Source technology has become more and more common in the IT world. It has become one of considerable alternatives for company in fulfilling their IT requirements.

Outsourcing Service

We believe that IT services outsourcing will strengthen our partnerships with clients while taking benefits in reducing development cost significantly.

IT Blueprint Development

To success in developing IT solution in company requires more than building applications to suit the needs. It also involves planning, budgeting and evaluating. We try to put all aspects from strategic framework to operational plan in one integrated master plan that can improve performance by using IT as competitive advantage.

Academic Information System (AIS)

A dynamic academic world poses numerous challenges to institutions of higher education. Universities must accommodate student choices with programs that are adaptable to changing environments.

AIS refers to a web based integrated solution to streamline student information processing and providing academic services starting from enrollment to graduation

Our Products

Mosaiq Monitor

"Driving profitable sales through performance control"

Mosaiq Monitor is an application package that enable companies with extensive field operations to effectively and efficiently track, manage and interact with their sales force
